PROFILE SUMMARY

Frontend Developer with 3.8+ years of experience building responsive, high-performance web apps using React.js, JavaScript (ES6+), HTML5, and modern CSS. Skilled in UI/UX development, API integration, JWT authentication, accessibility, and performance optimization. Experienced in Agile teams, writing reusable code, and delivering scalable features. Currently learning Data Structures and Algorithms (DSA) in JavaScript to strengthen problem-solving skills.

WORK EXPERIENCE

ACCENTURE – Frontend Developer Specialist (Feb 2025 – Current)

- Developed responsive UI components for holdings and investment modules using **React.js ,TypeScript** and StyledComponents.
- Integrated **RESTful APIs, JWT-based authentication**, and OTP login; enabled multilingual support (SE, FI, EN) with **i18n**.
- Built stock trading features (buy/sell, deposit/withdraw) with **CSV export, Highcharts** dashboards, and dynamic filtering.
- Enhanced account flows (withdrawal/deposit/dividend/redemption/Shares) with strong validation and seamless UX. • Implemented unit tests (**JEST**), navigation tests (**React Router v6**), and maintained CI/CD pipelines with SonarQube.
- contributed to Agile sprints, managing tasks across Epics → Sprints → Stories.
- Led front-end project setup using CASSA templates and integrated DevOps tools such as **JIRA, Bitbucket, Jenkins, Maven, Docker, and Kubernetes**. Configured CI/CD pipelines with Jenkins and SonarQube for automated deployments.

TATA Consultancy Services – Software Developer (Jan 2022 – Feb 2025)

- Built responsive UIs for leave management and internal e-commerce platforms using React.js, Redux, and Tailwind CSS.
- Implemented JWT authentication and ensured cross-browser compatibility across applications.
- Developed dashboards, optimized performance, and enhanced accessibility.
- Collaborated in Agile sprints, delivering scalable features and reusable components.

TECHNICAL SKILLS

Front-End	Back-End & Tools
React.js (Hooks, Context API), Redux Toolkit	Node.js, Express.js, REST APIs
HTML5, CSS3, JavaScript (ES6+), TypeScript	JWT Authentication, MongoDB, SQL
Tailwind CSS, Bootstrap, Styled-Components	Git, GitHub, Bitbucket, Jenkins
Flexbox, CSS Grid, Responsive Design	Postman, Swagger, SonarQube
Highcharts, JEST, Cypress	Azure DevOps, JIRA, VS Code
Figma, Chrome DevTools, Lighthouse	CI/CD Pipelines, JavaScript Development

AI TOOLS & INTEGRATIONS

- Worked with CloudAI, ChatGPT, Perplexity AI, and GitHub Copilot.
- Integrated Copilot into VS Code for code assistance and automation.
- Leveraged AI tools for faster development, debugging, and productivity.

EDUCATION

Bachelor's Degree | Mechanical Engineering | KIIT University (2016 – 2020)
