Satyam Rathore

Frontend Developer Specialist

priyasatyam1806@gmail.com | +91-6394614898 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with **almost 4** years of experience building secure, scalable, and high-performance web applications in the banking domain. Skilled in React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, and modern UI frameworks. Strong expertise in API integration, authentication flows, CI/CD pipelines, performance optimization, accessibility (WCAG 2.1), and cross-browser compatibility. Experienced in Agile environments, cloud tools, and writing scalable, reusable, testable code. Currently improving problem-solving through Data Structures and Algorithms (DSA) in Java **and learning Core Java** .

WORK EXPERIENCE

Frontend Developer Specialist

ACCENTURE | Bank Client – OP POHJOLA | Mumbai
Feb 2025 – Present (Serving Notice, LWD: 11 Jan 2026)

1. **Developed responsive and modular UI components** for holdings and investment & Security Custodies modules using **React.js, TypeScript, and Styled Components**, ensuring scalability and reusability across multiple features.
2. **Enhanced web accessibility (a11y)** compliance by leveraging **Sitecore Improvement Tool, NVDA**, and implementing **WCAG 2.1, ARIA roles, Semantic HTML**, and **Lighthouse audits** to improve usability for all users.
3. **Integrated RESTful APIs and JWT-based authentication**, including **OTP login** and **multilingual (SE, FI, EN)** support using **i18n**, enabling secure and globalized user experiences.
4. **Built and optimized trading workflows** (buy/sell, deposit/withdraw, dividend, redemption, shares) with **robust validation**, dynamic filtering, and **Highcharts dashboards** for real-time analytics.
5. Worked on **Bitbucket and GitHub CI/CD pipelines** to automate builds, testing, and deployment processes for faster and more reliable releases.
6. Utilized **Material UI, Bootstrap, and Tailwind CSS** to build scalable, responsive, and visually consistent UI components across modules.
7. **Refactored legacy class-based React components** into modern **functional components** using **React Hooks (useState, useEffect, useReducer, useMemo)**, improving maintainability and performance.
8. **Optimized performance through code-splitting and lazy loading** using **React.Suspense** and dynamic imports, significantly reducing initial load time and improving Lighthouse scores.
9. **Collaborated in Agile sprints,** managing features across **Epics → Sprints → Stories**, and led front-end setup using **CASSA templates** with **DevOps tools —** **JIRA, Bitbucket, Jenkins, Maven, Docker, and Kubernetes**.
10. **Contributed to backend API integration and testing** using **Node.js and Express.js**, with **unit and integration tests (Jest, React Testing Library)** for consistent reliability and maintainability.

Software Developer

TATA CONSULTANCY SERVICES | Bank Client – NORDEA | Mumbai

Jan 2022 – Feb 2025

1. Built responsive UIs for banking dashboards, leave management, and internal e-commerce systems using **React.js, Redux, and Tailwind CSS**.
2. Integrated secure **REST APIs and implemented JWT** authentication, ensuring compliance with bank-grade security standards.
3. Optimized application performance using **memoization**, API caching, and Lighthouse audits.
4. Developed role-based access, **form validations**, dynamic filtering, and data-driven UI components for various banking modules.
5. Improved accessibility using **Semantic HTML, ARIA tags**, and cross-browser compatibility fixes.
6. Actively participated in Agile sprint planning, story grooming, and delivering reusable UI components.
7. Used Git, Bitbucket, Jenkins, Postman, SonarQube, and Azure DevOps for versioning, CI/CD, code quality, and pipeline deployment.

EDUCATION

Bachelor's in Engineering *KIIT university,*
2016-2020

TECHNICAL SKILLS

FRONT-END TECH	BACK-END TECH
React.js (Hooks, Context API), Redux Toolkit HTML5, CSS3, JavaScript (ES6+), TypeScript	Core Java , Node.js, Express.js, REST APIs JWT Authentication, MongoDB, SQL .
Tailwind CSS, Bootstrap, Styled-Components Flexbox, CSS Grid, Responsive Design	Git, GitHub, Bitbucket, Jenkins Postman, Swagger, SonarQube
Highcharts, JEST, Cypress Figma, Chrome DevTools, Lighthouse	Azure DevOps, JIRA, VS Code CI/CD Pipelines,

AI TOOLS & INTEGRATIONS

- Worked with CloudAI, ChatGPT, Perplexity AI, and GitHub Copilot.
- Integrated Copilot into VS Code for code assistance and automation.
