Full-Stack Developer with 4.5+ years of experience building scalable, high-performance web applications across fintech and banking domains. Expert in React.js (Hooks, Context API, Redux Toolkit), TypeScript, Node.js, and RESTful/GraphQL APIs. Hands-on with microservices architecture, CI/CD pipelines, Docker, and AWS/Azure deployments. Proven track record of reducing release cycles by 20%, improving app performance by up to 50%, and maintaining 85%+ test coverage. Adept at leading code reviews, mentoring junior developers, and collaborating in fast-paced Agile/Scrum environments.

SKILLS

- **Frontend:** React.js (Hooks, Context API, Redux Toolkit), TypeScript, JavaScript (ES6+), React Query
- **CSS & UI:** Tailwind CSS, Bootstrap, SASS/SCSS, StyledComponents, CSS Grid, Flexbox, Responsive Design, WCAG Accessibility
- **Backend:** Node.js, Express.js, NestJS, RESTful APIs, GraphQL, Microservices Architecture, JWT, OAuth2, SSO
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQL Queries, Schema Design
- **Testing:** Jest, Vitest, React Testing Library — 85%+ code coverage
- **DevOps & Cloud:** Git, GitHub Actions, Jenkins CI/CD, Docker, Kubernetes, AWS (S3, EC2), Azure DevOps, SonarQube, JIRA, Bitbucket
- **Other:** Figma, Module Federation (Micro Frontends), PWA, Highcharts, i18n/Localization, Chrome DevTools, Postman, Swagger

EXPERIENCE

Senior Associate Consultant | Infosys (UBS Client Bank) | Mumbai, India

Jan 2026 – Present

Legacy Platform Modernization & Frontend Architecture

1. Architected migration of a monolithic UBS banking platform to a modular React.js + TypeScript micro-frontend architecture using Module Federation, improving team autonomy and release frequency by 35%.
2. Managed application state using Redux Toolkit and React Query for server-state synchronization across data-intensive financial dashboards.
3. Improved application performance by 35–50% using React memoization, lazy loading, code splitting, and virtualized rendering for large financial datasets.
4. Designed reusable component libraries with Storybook documentation, cutting new-feature development time by ~40% across squads.
5. Wrote unit and integration tests using Jest and Vitest, with end-to-end test coverage via Playwright, maintaining 85%+ coverage across all modules.
6. Managed CI/CD pipelines on GitHub Actions with Docker containerization and AWS deployments, enforcing automated quality gates via SonarQube on every PR.
7. Led weekly code reviews, enforced TypeScript best practices, and mentored 2 junior developers through structured onboarding and pair-programming.

FullStack Developer | Accenture (OP Bank Financial Group) | Mumbai, India

Mar 2025 – Jan 2026

Banking Platform — Investments & Transactions

1. Built pixel-perfect React.js + TypeScript UI components for holdings and investment pages directly from Figma designs using StyledComponents and Tailwind CSS, ensuring cross-device compatibility.
2. Designed and integrated Node.js/Express.js backend APIs with JWT authentication and OAuth2, securing endpoints for buy/sell stock flows, deposit/withdrawal, and portfolio management.

3. Implemented Redis caching on high-frequency API routes, reducing database load by ~30% and significantly improving response times for transaction queries.
4. Configured end-to-end CI/CD pipelines using Jenkins, SonarQube, and Kubernetes, reducing deployment release time by 20% and enabling zero-downtime rollouts.
5. Built OTP-based and mobile PIN-based authentication flows with JWT + OAuth2 for both registered and contracted user types, strengthening account security across all touchpoints.
6. Delivered interactive Highcharts dashboards with real-time filtering, dynamic CSV export, and GraphQL-powered data fetching for transaction and stock analytics.
7. Added multilingual support (Swedish, Finnish, English) via i18n localization libraries, expanding platform accessibility for Finnish banking customers.
8. Achieved 85%+ unit test coverage with Jest and React Router v6 validation; managed branching, PRs, and releases via Git and Azure DevOps.
9. Participated in Agile sprint planning and retrospectives, mentored junior developers through code reviews and best-practice sharing.

Software Developer | Tata Consultancy Services (NORDEA Bank) | Mumbai, India

Dec 2021 – Feb 2025

Employee Data Management & Internal Banking Platform

1. Engineered a Leave Management UI with automated email workflows using React.js and Node.js/Express.js, achieving a 90% reduction in manual HR processing time.
1. Developed interactive performance visualization dashboards with React.js and Chart.js, improving employee tracking efficiency by 40% and enabling data-driven HR decisions.
2. Converted Figma design specifications into pixel-perfect, accessible interfaces, boosting cross-device compatibility by 30% and user engagement by 20%.
3. Built modular styling systems using SASS/SCSS, Tailwind CSS, Bootstrap, and CSS Grid/Flexbox, reducing style duplication and accelerating UI iteration cycles.
4. Integrated RESTful APIs for real-time employee data sync, transaction feeds, and reporting; secured all endpoints with JWT authentication.
5. Applied Next.js SSR/SSG patterns on performance-critical pages, improving initial page load times by 25% for key internal applications.
6. Implemented WCAG 2.1 accessibility standards — semantic HTML, ARIA labels, keyboard navigation — ensuring compliance across all audit checkpoints.
7. Collaborated with Product Owners, BAs, QA engineers, and UX designers in Agile sprints, delivering features on schedule with zero critical defects at release.

EDUCATION

KIIT University | B.Tech | 2016 – 2020 | 8.1 CGPA

PERSONAL WORK

Harbourstone Realty — Real Estate Web App

1. Built a full-featured real estate platform with property listings, advanced search/filter, and inquiry flows using React.js, TypeScript, and Tailwind CSS.
2. Integrated Next.js SSR for SEO-optimized property pages and React Query for efficient server-state management and caching.
3. Applied component-level code splitting and lazy loading, achieving fast load times and a Lighthouse performance score of 90+.

PERCH Wine & Coffee Bar — Hospitality Web App

1. Designed and developed a premium restaurant and bar website with menu sections, event listings, and a reservation inquiry flow using React.js and Tailwind CSS.
2. Implemented full WCAG 2.1 accessibility compliance — semantic HTML, keyboard navigation, ARIA labels — and Progressive Web App (PWA) features for offline capability.
3. Deployed via Netlify with GitHub Actions CI/CD for automated builds and preview environments on every pull request.
